

## Product information AgeAway Shot

### Age healthily!

Support your body's protein, sugar and homocysteine metabolism and protect your blood lipids from oxidative stress. The AgeAway Shot contains various high-quality plant substances.

### What are AGEs?

AGEs are formed when proteins or fats react with sugar. This happens during frying and grilling, but also spontaneously in the body. Such AGEs accumulate in the tissue and induce inflammatory processes, metabolic disorders and tissue and vascular hardening.

We have investigated various AGE compounds and their effects on the body and discovered how certain natural substances positively influence these unfavorable compounds. The AgeAway Shot was developed in collaboration with Dr. Achim Refisch, who has been working intensively on ageing and related topics such as longevity and detox at cellular level for many years.

### How we avoid AGEs

- Generally healthy lifestyle, with a balanced diet and freshly prepared ingredients
- Avoiding heavily browned or burnt food
- Enough exercise, moderate sport
- Avoid smoking

### Advantages of the AgeAway Shot?

- Unique, scientifically proven nutrient blend
- Groundbreaking research, realized in a revolutionary, ingenious concept
- Selected raw materials of the highest quality
- No sugar, additives, auxiliary substances, colorants, fillers or preservatives
- Practical sachets for daily intake
- Vegan

### Recommended intake

Dissolve one sachet in 100 ml of water once a day and drink. Do not take together with dairy products (catechins may be rendered ineffective).
