

Product information Balance Vida

The ingredients in **Balance Vida** can help you to maintain your inner balance - in addition to a balanced diet, sufficient sleep and exercise and the reduction of personal stress factors.

Balance Vida contributes to normal thyroid function thanks to selenium and to the reduction of tiredness and normal mental function thanks to vitamin B12.

The thyroid gland plays a central role in the hormone system and is crucial for maintaining balance in the body and overall health. It produces thyroid hormones (e.g. thyroxine T4 and triiodothyronine T3), which control energy consumption, growth, heart rate and body temperature, as well as regulating metabolism.

Balance Vida was developed in close cooperation with the sports scientist and regulatory physician Prof Dr Elmar Wienecke and on the basis of his practical experience.

Advantages of Balance Vida

- Contributes to normal mental function, the functioning of the nervous system and the thyroid gland
- Developed in collaboration with Prof Dr Elmar Wienecke
