

Product information EMU OIL

Emu oil nourishes and supports regeneration and provides additional moisture.

Contains 100% natural emu oil. Without artificial preservatives.

Emu oil contains the following fatty acids valuable for the skin: oleic acid, linoleic acid, palmitic acid and the omega-3 fatty acid alpha-linolenic acid. We use emu oil from animals raised in a species-appropriate manner.

We source our emu oil from an Australian organic farm. The animals are kept in a species-appropriate manner with plenty of outdoor space and are fed a correspondingly natural and healthy diet. This is the prerequisite that the desired active ingredients in the oil are also present.

The Aborigines in Australia have known for centuries the nurturing effect of emu oil for the maintenance of healthy and resilient skin even with age. Emu oil contains important fatty acids that help the skin to regenerate and moisturize. Emu oil is produced in the subcutaneous fat tissue of emu birds.

Advantages of emu oil

- Nourishing effect for the maintenance of healthy and resilient skin
- From species-appropriate husbandry
- With fatty acids that help the skin to regenerate
- Dermatologically tested

Emu oil is supplied in a practical dispenser (airless pump). The oil is always protected from air contact and can be dosed cleanly. For one oil, it may be necessary to pump several times until the oil comes out.

Application

Gently apply the oil 2-3 times a day and let it take effect.

Directions for use

Store in a cool, dry place and do not expose to sunlight. Keep out of reach of children.

Minimum shelf life

36 months

Ingredients

Emu Oil, Tocopherol (Vitamin E), Helianthus annuus (Sunflower) seed oil.
