

Product Information Hydrating Skin Lotion

The Hydrating Skin Lotion contains SLM ECO®, Hydro-Gain®, almond oil, jojoba oil, mango butter, α -bisabolol (dragosantol) and D-panthenol (dexpanthenol). Dermatologically tested.

The Hydrating Skin Lotion is a care product especially for dry and irritated skin. Sufficient water content in the cornea is a prerequisite for healthy and elastic skin and proper functioning of the skin barrier. In the case of dry and irritated skin, the barrier function and the skin's ability to bind water must be supported. If you want to care for dry skin naturally, the Hydrating Skin Lotion from our "SLM Skin Repair" line is a very high-quality product.

LM ECO® - The innovative base lotion that imitates the lipid matrix

Like all products in our "SLM Skin Repair" line, the Hydrating Skin Lotion is based on a natural, lecithin-based emulsifier system called SLM ECO®. This cream base is a three-dimensional, lamellar structure that resembles the lipid matrix within the cornea and therefore significantly supports the skin's natural protective function. This effect has been proven in a study.

The dispenser attachment with the small opening helps with optimal and economical dosing. The valuable ingredients are protected from oxygen and oxidation in the airtight bottle (airless pump). At the beginning, several pumps may be necessary until the cream comes out reliably.

Allergy information

- no alcohol
- no mineral oil based ingredients
- no kerosenes
- no silicone
- no aluminum
- Non comedogenic
- no parabens

Application

Apply Hydrating Skin Lotion thinly and sparingly to the affected skin areas in the morning and evening and massage in thoroughly.

Hydrating Skin Lotion **is dermatologically tested.**

Directions for use

Store in a cool, dry place and do not expose to sunlight. Keep out of reach of children.

Minimum shelf life

24 months. Once opened, use within 3 months.
