

Product information IMMUNO DAILY

Immuno Daily is a dietary supplement with lactic acid bacteria, colostrum and vitamin D. Vitamin D contributes to normal functioning of the immune system.

Immuno Daily contains different strains of lactic acid bacteria cultures. These are considered to be physio-logically beneficial in addition to a balanced and varied diet.

Colostrum is the very first milk that all mammalian babies, including humans, receive from their mothers immediately after birth. Colostrum is endowed with a wealth of vital and protective substances to strengthen the immune system of the newborn and promote a good start in life. Of greatest interest are the numerous immune factors such as antibodies (immunoglobulins), hormones, growth factors or cytokines.

Advantages of Immuno Daily

- Contributes to normal functioning of the immune system (thanks to vitamin D)
- Contains different bacterial strains and 100 million bacteria per daily dose
- Has a gastric juice resistant capsule so that the ingredients are not released until they reach the intestines
- Adds lactic acid bacteria to the body
- Suitable for lacto-vegetarians

Recommended dosage

We recommend taking 1 capsule daily with sufficient liquid.

Minimum shelf life

36 months

Directions for use

This product is not a substitute for a varied, balanced diet, fresh fruits and vegetables and a healthy lifestyle. Store in a cool, dry place out of the reach of small children. Do not exceed the recommended dosage.
